Summary

MERN Stack Developer with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in RESTful APIs, authentication and authorization, database integration, and AI API integration. Currently working as a Web Developer Intern at Ruaanya Fintech, with a strong foundation in Data Structures and Algorithms and OOP.

Education

B.Tech in Electronics and Communication Engineering, ABES Engineering College — *2023 – 2027 (Expected)*

Class XII, Scottish International School, Shamli — CBSE — *2023*

Class X, Scottish International School, Shamli — CBSE — *2021*

Technical Skills

Languages: JavaScript (ES6+), Java, Python
Frontend: React.js, HTML5, CSS3, Responsive Web Design, EJS
Backend: Node.js, Express.js, RESTful APIs, MVC Architecture
Database: MongoDB, Mongoose
AI / LLM: Google Gemini API, LangChain, Streamlit
Core Concepts: Data Structures & Algorithms, OOP, CRUD, Authentication & Authorization, RBAC
Tools & Platforms: Git, GitHub, VS Code, Vercel, Render

Experience

Web Developer Intern — Aug. 2026 – Present

Ruaanya Fintech, Noida

- Develop and enhance web application features using JavaScript and modern frontend and backend technologies.
- Build and integrate RESTful APIs to support application features and enable frontend-backend communication.
- Collaborate with developers to test, debug, and resolve application issues, improving reliability and user experience.

Projects

AI-Powered Smart Campus | *React.js, Node.js, Express.js, MongoDB, Gemini API* — Aug. 2026 – Sep. 2026
GitHub Live Demo

- Developed a full-stack campus management platform with dedicated student, teacher, and admin portals and role-based access.
- Implemented complaint submission and tracking with rule-based High, Medium, and Low priority classification.
- Integrated Gemini API to automatically categorize complaints into Academic, Infrastructure, Electrical, Security, Cleanliness, and Other.

Wanderlust | *Node.js, Express.js, MongoDB, Mongoose, EJS* — Feb. 2026 – Jul. 2026
GitHub Live Demo

- Built a full-stack property listing platform using Node.js, Express.js, MongoDB, and EJS with user authentication and authorization.
- Implemented ownership-based listing creation, editing, and deletion, along with ratings, reviews, and interactive property maps.

TaskBot – AI Task Management Agent | *Python, LangChain, Groq, SQLite, Streamlit* — Oct. 2026
GitHub Live Demo

- Built a conversational AI agent using LangChain and Groq to create, view, update, and delete tasks through natural-language requests.
- Integrated SQL database tools, SQLite storage, and LangGraph memory in a Streamlit interface for conversational task management.

Certifications

- **Python for Data Science and Machine Learning** – IIT Roorkee
- **GitHub Copilot DevDays Ignite Participant** – Microsoft (Gurgaon Office)
- **Career Essentials in Generative AI** – Microsoft and LinkedIn Learning
- **Full Stack Web Development** – Apna College
- **Data Structures and Algorithms in Java** – Apna College

Extracurricular Activity

Content Coordinator — Oct. 2024 – Present

Enigma Programming Club, ABES Engineering College
